This permit and the entire plan for the ai center is wrong and extremely dangerous for the safety of the people and nature of New Mexico. Because of this, this permit should not only be denied, but the whole ai data center should be cancelled. Inform the people of New Mexico of what building this in tells for not only there future but generations to come. Don't just tell them what the owners of this building plan tell you. Don't protect the billionaires, protect the people and the only planet we have.
