

Lynnae M.

I oppose project Jupiter and the construction of the fuel cell generator. Not only will it contaminate all of our natural resources, take water that we already do not have and poison the people of new mexico. But it will take away from the beauty that is new mexico.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
