

Chantelle Yazzie-Martin

Do not approve the construction air quality permit for the Yucca Growth LLc organization as it supports project Jupiter and the data center being built in southern New Mexico. Not only has the process been rushed but there have been gaping environmental holes that are not being told to the public about the true impact to our water, air quality, and overall impact to the cities surrounding the center. We request that this permit be rejected and a full investigation into the environmental impact with anyone associated with the project Jupiter data center construction or any entities that will try to enter New Mexico Mexico to build this kind of center.
