

Roxanne Marquez

Hello, I am a native New Mexican and a community member invested in a healthy climate future for the coming generations. I do not support the air permit of Project Jupiter and believe it should be denied, particularly given Bloom Energy's history of illegally dumping hazardous waste. Additionally, the public has not been given enough time to comment on this issue, especially when going up against the mass coercion that Project Jupiter has ruled out to influence the public (i.e. paying influencers to promote the data center, harassing homeless people to fill out a comment in favor of the permit, etc). If this permit is approved — which would be an atrocious government sponsorship of environmental racism — we demand that a public hearing be held in Santa Teresa, NM in both English and Spanish with an option to comment remotely.
