

Jen DePaolo

I am writing to oppose the Jupiter project data center in New Mexico. Water is life, and New Mexico's Aquifer and watershed are already over taxed, depleted, and poorly managed. We need to conserve and steward our water for basic needs for all who live here and depend on it. We also need to conserve energy and better steward land use here in the land of enchantment. For this and other reasons I oppose the construction of a Data center here. Thank you for your time.
