

Destiny Rockwell

I strongly discourage the placement of any data center or ground plans that involve the use of NM natural resources. The non attainment zone this project will house infrastructure on is quite obviously government sponsored environmental racism. There are already so many problems in New Mexico to combat. Drought is certainly not a problem I'd like to have in a state I call home. Enough people in New Mexico do not have access to water. To use such precious and LIMITED resources for accelerated progression of environmental stressors to our one and only planet is an absolute disgrace and abomination.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
