

Kayla Gerena

We shouldn't be taking land from animals for profit, this isn't for the future of AI it's so billionaires can profit while we suffer with the air quality, limited water sources and heat waves, wake up people it was never about benefiting day to day citizens. Animals are losing their habitat because of greedy humans and in about 20 years from now several species will be extinct and your children/grandchildren will be asking what a coyote is. YOU CAN LIVE WITHOUT AI!!
