

Alannah Medina

The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. We are already seeing real tangible damage from these venture and awe are loosing water at a rapid rate. I cannot bring kids into this world knowing they have an unfair chance at a thriving earth and ecosystem. They are dumping this hazardous waste which is only further showing society that they do not care about us.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
