

Mathew Patalano

The project proposed by Yucca Growth is not in the public's best interest. But in addition to draining our resources for private profit that will not benefit the community, Project Jupiter will emit obscene levels of air pollution in our state. Their shady and dishonest tactics thus far - paying influencers, obtaining information from citizens opposed to the project and then using it to forge letters of support, misleading brochures, etc. alone should disqualify the permit from being granted and has clearly demonstrated their lack of integrity and respect for New Mexicans.

Time after time, in state after state, similar projects boast community benefits such as revenue and jobs that never pay off and are disproportionately overshadowed by the environmental harm and harm to public health resulting from the operations of such facilities. The people of New Mexico do not consent. We do not want or need this data center. We need cleaner air. We value our resources and the quiet of our natural surroundings. We strongly urge that permits be denied to Yucca Growth for this project and any others (under any names they adopt in the future) that they propose, as they have clearly demonstrated their lack of morality and respect for our communities.
