Building a large data center will harm the planet even more, contributing to climate change. As it's built near a river the people near the area will have less access to clean water as it's being primarily used for a data center, it produces a heavy amount of CO2 which is never good for our planet. The people are asking you to reconsider, as it will affect the lives and futures of many.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
