

Dear Chair and Members of the Board -

I believe New Mexico's greatest resource is its people.

Projects like Project Jupiter create opportunities for those people by supporting good-paying jobs, encouraging workforce development, and strengthening local economies. These investments also benefit the many businesses that provide goods and services throughout the region. I respectfully support approval of the requested air quality permits and appreciate your thoughtful review.

Sincerely,

A handwritten signature in blue ink, appearing to read "Mayra Castillo".
