

Abdel Ahmad

We can live without ai. Project Jupiter is not going to help our planet but rather will cause harm to us. We need water, which is what these data centers for ai rely on, and building more and bigger data centers will require more usage of water, which is very harmful for our planet. Please reconsider this project.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
