

Sohpia Ahmed

Project Jupiter is a project that will cause irreparable harm to the environment. We are already suffering from climate change and this project will only allow climate change to persist. It'll release 10 million tons of climate-warming greenhouse gasses every year, and void all the progress we have made against climate change in the past two decades. Nobody can make money if there is no world to make money on. NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid.
