I believe that Project Jupiter is harmful to the planet and should not be done. The planet is already facing irreparable damage due to AI. If this project is continued, there will be effects on the land and those who inhabit. Some of these effects include a lack of clean/safe drinking water, health issues, and loss of biodiversity. People should not care about money/profits over human and animal life. Any sane human being can see that having these data centers is a burden on the planet.

Therefore, there should be none, we have seen the effects, now we should act upon it to stop them.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
