

Alice Hutchins

I strongly oppose the approval of Yucca Growth Infrastructure's air quality permit. The amount of CO2 released will contribute to an already oppressive heat index over southern New Mexico and northern Mexico. It is environmentally and socially unjust to locate these loud, water- and energy-gobbling complexes in the poorest area of the poorest state in the United States. Those who will profit are already billionaires, while the poorest of the poor live with the effects of this boondoggle. Say NO to Project Jupiter.
