

Lorraine Montez

We do NOT Project Jupiter in Dona Ana County, or anywhere else in New Mexico! AI Data Centers are vastly damaging to the environment matter what Project Jupiter's marketing department scripts in its videos. We do NOT want AI centers to bring economic growth. We want long-term solutions that do not involve damaging our already delicate desert environment. We want you to think in the long-term not just about easy GREED and MONEY.

Do NOT be grifted by Project Jupiter, it doesn't pay your salary, YOU WORK FOR US THE TAXPAYERS.

I urge the New Mexico Environment Department NOT to approve this heinous, greedy, environmentally damaging gift.

Sincerely,
Lorraine Montez
