Hello! I am a student from Europe and i am against project Jupiter, i hope they give the public 60 more days to review and comment on it, a public hearing to be set in Santa Teresa in both english and spanish. I believe approving the permit would be government sponsored racism and should not be allowed. Given the history of this company with it's frankly disturbing illegal waste dumping it's extremely worrying to not have the community's interest in mind.

Thank you for reading my comment.
