

Bridey .

Stop using AI, the world has been perfectly fine without it. Parklands, swimming pools, forests, and the public of the world and New Mexico have a strong community of people who agree with this. They want to make change, the world wants to make change, but rich people decide what's quote on quote 'better and more sustainable'. It has become so much of an issue to the people of this town and planet that it has spread across to nations who want to stop this centre. Stop using AI, *don't* make project Jupiter, just look at the history of the world and see how well humankind did without technology and artificial intelligence. The world was and always will be, better without it. It is ruining creativity, water supplies, nature, makes people less inclined to put in actual effort. STOP
