

Jazmin White

Please don't let pure greed drive your decision to build this data centre, we need to give back to the planet now more than ever. Building this centre will damage the world more than anyone can justify, please help make a better world for our younger generations. The public needs to be given adequate time to learn and understand the dire situation that is upon them. If humans accept this air quality permit I would wonder how the world ever has a chance of change when humans are destroying their own home for money. If this permit somehow passes it is only right for a public hearing to be held because if you won't read our pleas, you will have to listen to them.
