

Yaser Al-Khateeb

What do the idiots who are thinking about approving this genuinely think is going to happen if they approve this? You can literally feel the climate change this summer and your first thought is to approve another data center? Are you genuinely incompetent or just brain damaged? This data center ALONE will release 10 million tons of greenhouse gasses, more than the 3 largest cities in NM COMBINED. COMBINED! The difference is people live and work in cities. This generates minimal jobs and provides essentially no economic benefit unlike cities. Additionally, where are you going to get all the electricity to power this data center for? The unproven fuel cell technology that has no guarantee it will work? That generates toxic waste? Or are you going to sacrifice everyone else in the state to power this monster? What about the schools and daycares in the area? Children with developing lungs or staff and minors with respiratory issues? What happens to them? The NMED's mission is to supposedly "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations.". This data center goes against all that. AI doesn't even make money. The loser Sam Altman who started this ai bullshit and open ai is literally bleeding money. There are no reasons for the construction of this data center. If you approve this, you will cause nothing but destruction to NM's ecology and to its people.
