

Meranda Feagin

This project cannot go forward. We cannot continue to sacrifice our people, our health, our earth for profit. These companies try their hardest to come up with pretty numbers, but they lie. We know by how drastic the first set of numbers differs to the second. What is planned cannot be allowed to happen. It's sad that we have to beg, as citizens, for tech companies that do not care about us not to be handed the rights to destroy our only planet. I'll never have children, but I want YOUR children to breathe clean air. Drink clean water.
