

Barbara Wisoff

Please shut down permanently Project Jupiter. No for the air permit application because Project Jupiter would be climate disaster and have negative health impacts for nearby and far away communities. The wind blows pollutants and they settle in the ground and affect widespread areas. I am 69 years old and have asthma and particulate allergies. My toddler age grandchildren live in Albuquerque and I want them to have a future here to look forward to. Data centers don't belong in desert states. Our water supply would be stolen by any data center. Jupiter's false advertising and fraudulent comments in support of the project are criminal and evidence of their illegal behavior. They cannot be regulated and they don't belong here. The NM Sovereign Fund of over \$71 Billion can well afford to prevent corporations from stealing our water, land and health.
