

Anna Dias

WE DON'T NEED MORE AI DATA CENTERS. But we do need clean water and nature, if you really think that you are going to be safe when the consequences of this shit start to show, bad news, you're not that important for these companies nor the billionaires. Do your job and protect our environment and air quality.

New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
