

Jennifer Hernandez

We need to be doing things to preserve our home and it's resources not allowing things like data centers to take away those precious resources and further damage our fragile ecosystem and lands. We need to take care of it if we want to be able to continue our way of life in this beautiful place. Otherwise I fear these data centers are going to strip away our resources until this really does become a barren wasteland incapable of providing a home to us. Please help us preserve our beautiful New Mexico. The land of Enchantment. The hidden gem of the Southwest.
