

Rose Newton

We as the state of New Mexico have been devastated for generations by water loss. Generational farms are being bought out, going bankrupt, water rights being sold, and families going hungry. Everyone on the planet eats food grown from our New Mexico soil. Pecans. Green chile. Water melons. The list goes on and on and on. And on. We humans cannot survive without food. We cannot survive without water. We can survive without tech CEO billionaire AI data centers. Return our water to our people. Our land. Everyone's food. Cancel these data centers. Fund our communities. Not billionaires.
