

Vanessa Kenner

Myself and my community DO NOT want project jupiter building their data center on our precious land. We DO NOT WANT anything you claim to offer and we know that this will do more harm than good! If you need a permit to contaminate our air that says a lot. The amount of water needed to power this plant is sickening especially given the state of this land, WE HAVE NO WATER to give is this a joke!? I am truly frightened for myself and my community because we don't deserve this potential harm and stress in already difficult times. Keep your data center away from us!!

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
