

Melissa Shepard

The lies and propaganda being spread by those behind Project Jupiter simply cannot be believed. The majority of studies being done on similar projects as well as projections for Project Jupiter show that the impact on the surrounding communities will be devastating. To believe that this data center will somehow avoid the negative impacts that every other data center has already inflicted on human lives is absolute madness. We simply cannot afford to let ourselves be manipulated by corporate greed. This data center is bad for our people, bad for our environment, and bad for New Mexico. If this monstrosity is built, we will be dealing with the catastrophic effects for generations to come. We will look back at this moment as the point where we could have changed direction and saved ourselves. I strongly oppose this and all future attempts by those seeking to build data centers in New Mexico. Our health and safety and prosperity are not for sale.
