I live in Sweden and I know that the ai data centers will make our climate worse by doing stuff like making our water levels ride because the construction will put out a bunch of bad gases and will make the layer of green house gases go out of balance and make the earth hotter I also know that our water that we have on our planet that is getting used is from lakes and go into oceans when it evaporates which makes the water cycle obsolete and it will not work because the clouds that will be created will most likely drift over To a ocean and rain there instead of raining in our lakes or ground.

New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
