You call yourselves public servants, your entire objective as a governing body is to make good on your commitments of what you're supposed to protect. And yet, you propose a plan that will come with colossal, potentially irreversible detriment on our environment, our community, and our home. You should be ashamed of yourselves. The dedicated, hardworking, spirited people of Southern New Mexico are not lab rats, and we certainly have no interest in our home being annihilated by the interests of a privately-run, for-profit corporation that couldn't care less about the harm they might do to anything or anyone else as long as they make a buck. Many areas lack the water needed to even survive, our air quality is already not up to par, and all this will do is make it worse. Deny this permit. If you don't, may it weigh forever on your conscience.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
