

Alyssa Hall

Please allow the public an additional 60 days to review and comment about the benefits of Project Jupiter and how it impacts the community. Emphasizing the Air quality/Water quality for the nearby community and for the state overall. The air quality permit needs to be denied, if failure to deny the permit. A public hearing needs to be held in Santa Teresa providing English and Spanish language/translations as well as an option to participate virtually for ALL communities. Shall the permit be approved, the government willing admits to committing a government-sponsored environmental racism to residents living in Doña Ana County. The residents currently face disproportionate environmental discrimination due to the pollution impacting the county. Enforceable reminder that Bloom Energy does not have credible liability nor stable platform due to the company history of illegally dumping hazardous waste. Money and opportunities would be hindered and not fruitful. Please reconsider the permit. NMED entire mission is to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations. Future generations will not have a healthy environment should Project Jupiter commence. This is not helping the community, it will be dangerously damaging the environment leaving irreparable harm and cost more money in the long term sustain the plant. Project Jupiter is not needed. DO NOT approve the air quality permit. Residents of Doña Ana County is worth more.
