

Kelly Cockrell

I am against Project Jupiter and am asking that you not approve the air quality permit that YGI has applied for. Please extend the commenting for another 60 days so the public can understand the what's at stake. I myself witnessed a woman hired by YGI at an ABQ bus stop asking people to sign a paper giving their opinion and it was disingenuous because the documents were being falsified in favor of the project.

Our state is suffering from massive drought and we cannot afford to provide any more water to give to these data centers. Tell them to go to states that have much more water.

Please do not provide YGI with this permit. Thank you
