

Estefany Broyles

We need to preserve all the natural areas as much as possible. Air quality is part of the natural areas. The more we clear the sky of pollution and reduce pollution the better we will have a good chance to protect ourselves. Company's could care less for the people. It is all about profit. Brextable Air will one day be nonexistent if we don't protect what we currently have. So no to project Jupiter. No to more unnecessary machinery that is not environmentally friendly not beneficial to the people where it will be built! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
