

Dawn Franco

Today I am documenting my public comment in opposition to project Jupiter. I am a local, Las Cruces resident. I am a New Mexican and my family has been here for years and generations. I completely oppose project Jupiter. Whether it's the water usage, pollution, lack of transparency, lack of accountability and misinformation, I am completely opposed. No data centers in Las Cruces, no data centers in Dona Ana County, no data centers in New Mexico. The economic opportunities are merely a front and the information has been manipulated. I don't believe that decent jobs will be created from project Jupiter. It has already been proven that AI is damaging the working class and that AI is slowly replacing the working class. I do not wish to have a data center that will further cause this harm in Dona Ana county, I do not want a data center that will further perpetuate this harm in Las Cruces. Everything about Project Jupiter, I absolutely oppose, especially the county and the commissioners with their NDA nonsense. I hope this project will be shut down, and I hope the Doña Ana County commissioners will be held to full accountability for their lack of transparency, and their behind-the-scenes deals. I also hope Meta will face accountability and some sort of repercussion for all the misinformation. Thank you I oppose project Jupiter, the end.
