

Talissa Montoya

Do not for the love of god put in this data center! You will genuinely kill us all, look at our rivers!! You think they can handle giving out 1MIL of gallons a day of an AI that's slowly killing us all. Plus our students will just end up stupid, with AI they can't do the basic reading/writing skills that require for life! We will probably end up at worst education again. Please don't do this!!
