

anónimo Na

I hope we are aware that when humanity goes extinct, this world will go on without us. It does not need us to exist. Yet we do. My biggest wish is for the people in the head of this project to see how SMALL they are. That in the millennia that come, their names will become blurry, just like the water we will drink, like the news we will share, the air we will breathe. It is not Earth that is dying.
