

Andrew Stachniak

I'm vehemently against the construction and development of AI data centers like project Jupiter. They serve no purpose for the people, and only serve the purpose of taking much needed resources and land from the community that is being affected by this development. These ai data centers only purpose is to line the pockets of the rich, who have no care of the environmental impacts this development will cause to the environment and surrounding communities. This development will only add to the green house gas problem that people are dealing with all across the globe. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
