

Savannah Bowen

I am against project Jupiter I want it to be stopped in order to stop losing water, keep the water communities rely on , and make sure the future of citizens lives are economically sound. Without water, The Rio Grande drying up, and the people of project Jupiter building more data centers I am scared I won't be able to graduate high school or go to college and see to it that the future I waited for my whole life happens. Project Jupiter is just one of the many roadblocks for me and kids my age who are also young and have a future ahead of them.
