

Faith Rodriguez

Hello, I personally find it inhumane and extremely unethical to use AI let alone build a data center that will release 10 million tons of carbon dioxide into our planets atmosphere and drain our water sources. We've NEVER needed AI, AI is not a necessity and it is not something the public needs access and it's definitely something our government doesn't need to implement as heavy as it is right now. People are going to die but what effect does that have on the billionaires? It doesn't have an effect on them but it does.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
