

Natalie Anonymous

My name is Natalie, and I am against the Yucca Growth infrastructure. I want to live in a safe, clean environment where I don't have to worry about clean air and pollution. What they're doing should not be tolerated, they're hurting our planet and destroying it. What they're doing will affect our future and ecosystems. I ask that you refuse Yucca growth's infrastructure air quality permit. If you allow them to put all this carbon dioxide in the air, we will have even more intense heat waves, causing millions to be hospitalized or killed.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
