This data center is unconstitutional, illegal and directly threatens New Mexicans well beings as much as a terrorist threat. This data center will cause noise pollution, habitat loss, extreme water usage and loss, massive affects on our power grid, and most importantly displaces New Mexicans from their homes. This is a direct threat to New Mexicans safety and will be treated as an act of treason against the people if this continues to go on. We will have no choice but to enact our rights as citizens to protect OUR LAND. Those politicians who work with these devilish corporations will be held accountable as well as anyone else in favor of these domestic terrorists.
