

Hannah Chaney

I staunchly stand against any construction of project Jupiter. Our water supply, animal habitats and wellbeing of the community will ALWAYS be more important than profit. We need to have better transparency from these companies who are trying to extract more from the environment for their own gain. Please deny this air permit so that the people of these communities can continue to breathe.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
