

Ingrid Askew

Hello, my name is Ingrid Askew and I am a resident of Albuquerque, New Mexico. I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County.

I've lived in New Mexico my entire life, and I'm entering my final semester at UNM. My plan was to stay in New Mexico for as long as I could, but something like a huge AI data center makes me ashamed to call New Mexico home. We, as a state, do not have the resources to give away our water. My entire life has been filled with the looming threat of our river running dry and it's happened every year for the past several. Our priority should be rebuilding what we have, instead of expanding beyond our capacity. The health and happiness of New Mexicans along with harmony with our environment should be top considerations, both of which project Jupiter do not align with.

Thank you for your consideration,
Ingrid Askew
