

Hemen G

I really don't want to see this data center being built. It will ruin the wildlife around the area and deplete water that is already limited. It will harm the people and the animals already living there and there's no way people can expect me to believe that this is good.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
