

Ethan Campbell

Good afternoon,

My name is Ethan Campbell, I was born and raised here in Dona Ana County. I am writing to you today to ask that you please stop building, cancel your contracts, and relocate your operation somewhere outside of New Mexico.

I largely feel that Project Jupiter was not put up for public vote and was approved by a board of county commissioners who didn't factor in the best interests of the people who actually live here. I did not ask for generative AI, I didn't ask for tech companies to control the majority of wealth and power in the United States, I didn't ask for a datacenter to be built, and most importantly I did not vote for it. I never got a say, I contacted the county commissioners and they went ahead with the plan anyway. I have lived here my entire life, and I think you probably looked at New Mexico, but more specifically southern New Mexico as a wide open space ready for development. It is not. We are a simple people, who have been here for literally 21,000 years. This state is a beautiful ecological marvel, you know the whole "Land of Enchantment" thing.

I understand that the federal government has tested bombs here, flown experimental aircraft here, and stored nuclear waste here. But those decisions will leave behind long lasting effects that people in my community will not fully understand in our lifetimes. You know somewhere in the back of your head that your data center will do the same. Please take a second and consider that you are trading short term profits for my home, and nobody asked me.

Money isn't worth a thing if there is nothing left to buy. It is not too late to do the right thing! Please cancel what is in place and go somewhere else.

Sincerely,
Ethan Campbell
