

Erin Munoz

As a 4th generation New Mexican, I am writing to inform the NMED that I do not support the building of Project Jupiter or any data centers in our state. Historically New Mexico, (both our land and our people) has been seen as little more than a desert full of Mexican/Latinx and Native American peoples. New Mexicans are the ones who know how precious our land is and are who have stewarded this land for centuries. Allowing Project Jupiter to proceed is an injustice and a slap in the face of generations of New Mexicans who fought to protect our sacred land. I implore the NMED to do right by past, present, and future New Mexicans: deny this application and support our people.
