

Antonina Gracjasz

This is insane. Not only are you endangering the lives of local communities, contributing to climate change that already is killing people RIGHT NOW, you're also losing money on a dying industry. Building a new giant data center won't bring back AI. The bubble is popping, whether you want it or not. I need people to realize that you cannot eat money. Every new data center, every dollar spent on genAI is killing hundreds of trees, therefore contributing to our already deteriorating climate. If every last tree is dead, money won't buy you food to survive. Sincerely, Antonina Gracjasz

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
