Nobody wants these data centers! Save for the elite few who profit off of them. And hey, they're way outnumbered. They drain the water, emit awful frequencies, ruin the air, and nobody with any sense wants anything to do with them! And if not for the environment, for the arts! Corrupt businesses use Ai to generate images and videos for promotions, taking away creativity and oh, JOBS. Ai takes away JOBS from people who need to WORK to EAT to RAISE CHILDREN to BUY CLOTHES to PAY FOR RENT and HOUSING. Students use Ai to do their HOMEWORK. They are EARNING DEGREES WITHOUT LEARNING ANYTHING. We will have IDIOTS RUNNING THE COUNTRY. No one will know how to do ANYTHING. Ai = bad, I don't know how to make it more plain than that.
