

Holiday Anonymous

I live in California and I don't know a lot about data centers but I know how harmful they are to our planet. We can live without AI but we can't live without water. These data centers will cause more climate change than we already experience. It will make summers hotter kill animals and eventually us. I hope that we will stop the usage of AI in the next few years before our actions become irreversible.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
