

Austin Martin-Likes

My family and I are not okay with this project. We are shocked and disgusted at the shady practices of project Jupiter; we are not okay with having this threat to our communities health, air, and water; further, we are furious that the community has been ignored and even antagonistically silenced by corrupt representatives.

New Mexicans are owed clarity on how this project will be held accountable for the damage it will do. This project is Poison for our community and we do not want it here.
