

## Anon Anon

I am only eighteen and scared for my future because of the pollution and contamination caused by these data centers. My family is scared to bring children into this world, fearing what they would have to go through in their lives. I am already compromised in my immune system and have gotten very ill just drinking the water at my house. It is terrifying to imagine what more data centers could cause and what the future holds.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
